Java

```java
class Solution {
    public String originalDigits(String s) {

    }
}
```

JavaScript

```javascript
/**
 * @param {string} s
 * @return {string}
 */
var originalDigits = function(s) {

};
```

TypeScript

```typescript
function originalDigits(s: string): string {

};
```

C++

```cpp
class Solution {
public:
```

```cpp
    string originalDigits(string s) {

    }
};
```

C#

```csharp
public class Solution {
    public string OriginalDigits(string s) {

    }
}
```

Kotlin

```kotlin
class Solution {
    fun originalDigits(s: String): String {

    }
}
```

Go

```go
func originalDigits(s string) string {

}
```
